

DIGITAL RETINAL EXAM

In our continued efforts to bring the most advanced technology available to our patients, Dr. Roselli is proud to announce the addition of the Digital Retinal Exam as an integral part of your eye examination.

As doctors, we are concerned about diseases such as macular degeneration, glaucoma, retinal holes, and systemic diseases such as diabetes, stroke, and high blood pressure. These conditions can lead to serious health problems including partial loss of vision or blindness and they often develop without warning and progress with no symptoms.

A Digital Retinal Exam provides:

- An eye wellness scan.**
- An in-depth view of your retinal layers (where diseases can start).**
- The ability to view your eye with your doctor during your examination.**
- An annual, permanent record for your medical file, which gives your doctor an accurate way to track small changes and diagnose potential eye disease.**
- Images which can be printed or emailed to take with you at your request.**

The Digital Retinal Exam is fast, easy, and comfortable.

Insurance typically does not cover any advanced screening technology beyond a general eye examination. If a problem is found during your screening, more detailed imaging may be needed, which can be filed to your insurance in place of the screening. Dr. Roselli highly recommends the Digital Retinal Examination for all patients.

EXAMPLES

NORMAL EYE

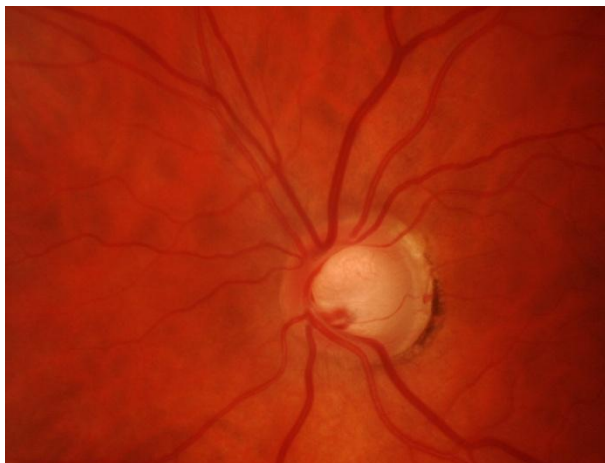

EYE MELANOMA

DRY MACULAR DEGENERATION

WET MACULAR DEGENERATION

GLAUCOMA

TRAUMA FROM BASEBALL
